

## What does “pointing” mean?

The LAT FOV is huge:

For the purposes of setting slew requirements define

- **LAT FOV**: anything within  $\pm 55^\circ$  (0.96 radian) (TBR) of normal incidence is within the **LAT FOV**.
- “**Pointing**”: the target is within  $\pm 30^\circ$  (0.52 radian) (TBR) of normal incidence. Individual targets may have a different criterion, depending on their characteristics.
